FOREWORD

The Bureau of Health Statistics of the Department of Health for the State of Utah presents the 1980-1982 report of marriages and divorces occurring within the State of Utah.

This report contains a descriptive narrative section with an introduction and separate chapters on marriage and divorce which include basic analyses. Following the narrative section are the reference tables for marriage and divorce. The reference tables are followed by a technical appendix which provides background information on sources of data, their limitations, and material for use in interpretation of the data.

This publication was prepared by the staff of the Bureau of Health Statistics under the direction of John E. Brockert, Director, and Marvin Levy, Deputy Director. The statistical tabulations and analyses were performed by Gery E. Moore, Statistician. Norma Jacobsen prepared the manuscript for printing, and Ella Rene Ellett did the final editing.

INTRODUCTION

INTRODUCTION

Family formation (marriage) and dissolution (divorce or annulment) are important components in the development of our society. Changes in the rate of family formation and dissolution are important indicators of possible changes in life style. The purpose of this report is to present, statistically and graphically, many of the demographic characteristics involved in these events. A study of these data may provide information which can be used to determine what factors affect the increase or decrease of family formation.

This report, where feasible, includes data for ten or more years to indicate developing trends. An attempt has been made to include similar data from national statistics to provide a comparison of Utah with the nation. Caution should be used in making inferences from the comparisons, as national statistics are derived only from those states which report marriages and divorces to the National Center for Health Statistics (NCHS).

Since marriage and divorce are legally defined, they are subject to individual state laws. The minimum age for marriage, grounds for divorce, and the length of residence before a divorce may be granted, vary widely between states. These differences, and others, may cause major variations in marriage and divorce rates between states as well as wide deviations from national rates. The variations that result from the different laws frequently make comparisons between states of dubious value, and comparisons between a state and the nation must be done cautiously to be meaningful.

Another point is that while marriage data are usually presented by place of occurrence, divorce data are always presented by place of residence. There is no national agreement, as there is for other vital statistics, for the interstate exchange of nonresident data. Therefore we are unable to identify and tabulate how many of Utah's residents go outside the State to marry. This problem technically does not exist for divorces, since legally one may obtain a divorce only in the state where one is a resident.

Usually marriage and divorce rates are presented as the number of these events per 1,000 population. Occasionally statements are made such as "for every two marriages occurring in the United States there is one divorce." Statements of this type are the result of comparing the number of marriages and divorces occurring in a single year. Such comparisons are misleading and erroneous. Consideration must be given to the fact that the population at risk to divorce includes the sum of all persons who were married in previous years and are still married in the particular year under study. This kind of information is usually available only at the time of a census of the population.

A more recent problem relating to analysis of the data is the increasing levels of non-response. Many of the certificates, particularly divorces, received by the Bureau of Health Statistics are not complete for all items. Those items which are not completed appear as "not stated" on the statistical tables. Whenever the frequency of "not stated" items become significantly large, the statistical value of the particular totals and items which they constitute is reduced. The number of divorce tabulations has been greatly reduced in this report because of the high non-response for selected items on the divorce record.

Non-response has increased significantly to the questions regarding race, education, previous marriages, and religion. These data represent extremely critical factors in the stability of marriages. The data are confidential and are never released or made available in a way that would identify the individuals. Better statistics must be available, if the public is to have information which is so critical to form adequate policy regarding family formation and stability. For the Bureau of Health Statistics to provide complete data it will require the cooperation of concerned individuals, the clergy, the legal profession, and the county and court officials to submit completed marriage and divorce certificates .

A general overview of marriage and divorce during the past 43 years is presented in Table 1. Data in this table serve as a basis for the discussion of marriage and divorce rates throughout this report. Comparisons of Utah's and national marriage and divorce rates, 1943-1982, are shown graphically in Figures 1 and 2.

TABLE 1

ESTIMATED MIDYEAR POPULATION, MARRIAGES AND DIVORCES REPORTED
NUMBER AND RATES: UTAH AND UNITED STATES, 1940-1982

YEAR	ESTIMATED MIDYEAR POPULATION	MARRIAGES NUMBER	MARRIAGES RATE	MARRIAGES U.S. RATE	DIVORCES NUMBER	DIVORCES RATE	DIVORCES U.S. RATE

NOTES: UTAH'S ESTIMATED MIDYEAR POPULATIONS WILL NOT AGREE WITH PREVIOUS EDITIONS OF THIS REPORT. ADJUSTMENTS REFLECT U.S. BUREAU OF THE CENSUS ESTIMATES, 1940-1969, SERIES SP-25, NOS. 139, 304, AND 460, AND ESTIMATED MIDYEAR POPULATIONS, 1970-1982, ARE FROM UTAH'S POPULATION ESTIMATES COMMITTEE. RATES FOR MARRIAGES AND DIVORCES ARE PER 1,000 POPULATION.

[a] THE TOTALS FOR THESE YEARS ARE TRANSCRIPTS RECEIVED.

(1677N)

MARRIAGE

MARRIAGE

Unless otherwise stated in this report, the total number of marriages which occurred in Utah each year, represented by transcripts received, will be used as the basis for analysis. There are many other permutations for analysis including both parties residents, groom resident with bride nonresident, bride resident with groom non-resident and both parties nonresident, however this report will focus primarily on all marriages occurring in Utah.

Table 2 summarizes the distribution of marriages reported, transcripts received and residence of couples for each year, 1980-1982.

TABLE 2

MARRIAGES REPORTED, TRANSCRIPTS RECEIVED AND RESIDENCE OF COUPLES: UTAH 1980-1982

	NUMBER OF MARRIAGES		
	1980	1981	1982
MARRIAGES REPORTED	17,079	18,346	18,427
TRANSCRIPTS RECEIVED	16,958	17,914	18,427
RESIDENCE:			
BOTH PARTIES RESIDENTS OF UTAH	14,299	15,436	16,028
EITHER OR BOTH PARTIES NON-RESIDENTS OF UTAH	2,659	2,478	2,399
TOTAL MARRIAGES OCCURRING IN UTAH	16,958	17,914	18,427

Marriage Rates

In 1980, 1981 and 1982 there were 17,079, 18,346 and 18,427 marriages reported in Utah. However, for 1980 and 1981, only 16,958 and 17,914 transcripts were received. The rates, based on the number reported, were 11.6, 12.1 and 11.8 marriages per 1,000 population, with 1982's rate equal to the 1979 rate. There was a four percent increase in the national rate from 1979 to 1982. In the 12 year period, 1961-1972, both the Utah and U.S. marriage rates increased steadily, with the Utah rate growing somewhat faster than the national rate. Starting in 1975, Utah's rate started to decline, but it is still higher than the U.S. rate. In 1966, the Utah rate equaled the national rate and since then has surpassed it each succeeding year.

Marriage rates are calculated by the county in which the marriage occurred, Table 3. Sanpete County which has a Temple of The Church of Jesus Christ of Latter-Day Saints (LDS), has the highest marriage rates in Utah. The annual marriage rates in Sanpete County, 1980-1982, were 51.9, 44.2 and 6.8 marriages per thousand population. The decrease in the rate in 1982 reflects the temporary closing of the Temple for renovations.

In general, in Utah, marriages rates appear to be higher in counties which have LDS Temples, e.g., Cache, Salt Lake and Washington counties, although Utah County with a large LDS population and a Temple had relatively low marriage rates during 1980-1982. Also, Grand County which does not have a Temple had relative high marriage rates during these years, 17.8, 19.5 and 19.9 respectively.

Marriage Order

For 1980 through 1982, first marriage rates have continued to decrease for both males and females in Utah, Table 4, and Figures 3 and 4. The remarriage rates have continued to increase since 1979. This trend indicates that proportionately fewer people are getting married for the first time and more previously married people are remarrying.

Median Age at Marriage

Figures 5 and 6 summarize median age at marriage for males and females in Utah and the United States, 1963-1982, while these summary data are shown Table 5.

The median age of females for all of Utah's marriages increased to 22 years in 1980. This was the highest median age for all marriages to females in Utah's history. The median age decreased to 21 years in 1981 and 1982. The median age for first marriages to females has remained constant at 20 years since 1972. For females remarrying, the median age has been constant at 28 years since 1970.

NOTE: THE NUMERICAL DIFFERENCE IN MEDIAN AGES FOR UTAH BETWEEN 1963-1969 (MEDIAN AGE TO ONE DECIMAL) AND 1970-1982 (MEDIAN AGE TO WHOLE YEAR) IS DUE TO A CHANGE IN THE METHOD OF COMPUTING MEDIAN AGE. IN THE EARLIER YEARS, DATA WERE COMBINED INTO FIVE YEAR AGE GROUPS, WHILE NOW THE DATA ARE UNGROUPED AND INDIVIDUAL YEARS ARE USED. MEDIAN AGES NATIONALLY ARE COMPUTED FROM GROUPED DATA.

[1] NATIONAL CENTER FOR HEALTH STATISTICS: "ADVANCE REPORT OF FINAL MARRIAGE STATISTICS, 1981," MONTHLY VITAL STATISTICS REPORT, VOL. 32, NO. 11, SUPP., DHHS PUB. NO. (PHS) 84-1120, PUBLIC HEALTH SERVICE, HYATTSVILLE, MD., FEB. 29, 1984.

Nationally, the median age has been increasing steadily for all females getting married, both first and remarriages. The median age for all marriages increased from 21.3 years in 1963 to 24.1 years in 1981.

The median age of males for all of Utah's marriages reached a new high of 24 years in 1982. Prior to 1982, the highest median age was 23 years. For first marriage, the median age for males has stabilized at 22 years, 1970 through 1982; while the median age for remarriage has been constant at 31 years from 1974 through 1982.

The median age of all marriage for males, nationally, has increased dramatically, from 24.2 years in 1974 to 26.3 years in 1981.

Officiant

The percent of marriages performed by civil officials has increased in recent years, particularly in 1981 and 1982, Table 6.

In Utah there is a distinct preference for a religious ceremony for both first marriage and remarriage, Tables R-31-33. The percentage of civil ceremonies is higher for remarriages than first marriages. From 1969 to 1980, the proportion of civil to religious marriages remained relatively constant; however, in 1981 and 1982 there was a sharp decline in the proportion of religious marriages, 6.5 percent and 3.4 percent respectively. It is not known if this reflects a change in reporting, or in fact, illustrates a change in practice.

TABLE 6

MARRIAGE CEREMONY BY OFFICIANT, PERCENTAGE
UTAH, 1968-1982

1970	100.0	79.6	20.1	0.3
1969	100.0	80.4	19.2	0.4
1968	100.0	76.8	22.8	0.4

Education

The education of bride by marriage order is presented for the years 1970 through 1982, Table 7. During each of the last 13 years, almost one-half of all brides marrying for the first time have had one or more years of college, while one-third have been high school graduates and between 15 to 20 percent had not completed high school. For remarriages, these percentages shift. Most remarriages have been to females who have graduated from high school, 42 to 49 percent, with about one-third having one or more years of college; and from 15 to 25 percent having not graduated from high school.

Teenage Marriages

Marriage data in Utah by age for 1980 through 1982, show that 4,780, 4,883 and 4,587 resident females were married as teenagers, Table 8. This was approximately 30 percent of all resident brides married during these three years.

Table 9 gives the percent of total resident marriages that occur to resident teenage brides for each district and county for each of the three years. In general, the urban counties, i.e., Davis, Salt Lake, Utah and Weber, have smaller percentages of teenagers marrying than the rural counties. If Cache County is included in the definition of an urban county, it appears that the trend toward marriage at a later age by women is a phenomenon of the urban environment. Also, in these rural counties, the annual number of marriages is small, and the year to year variance in the percentages can be large. Therefore, these high percentages may not be statistically reliable.

One possible explanation for women in urban areas marrying at an older age is that they have more opportunities to be self-supporting and achieving parental independence. Also, the opportunities for acquiring advanced education are greater in urban areas and females as well as males may delay marriage until their education is finished.

There is both concern and interest about the survival of teenage marriages where one of the persons married is under age 20. If we make the assumption that the percentage of those who marry as teenagers is constant over time, then the percentage of divorces to those who married as teenagers should be approximately the same from year to year. Any pronounced differences would indicate that marriages of persons who married before age 20 are more/less likely to survive than the marriages of those who marry at age 20 and over.

Table 10 presents the proportion of marriages and divorces occurring to couples where either husband or wife was under 20 years of age at the time of marriage. These percentages are compared to the U.S. percentages.

Although a higher percentage of teenagers get married each year in Utah than nationally, there is a decreasing trend in this phenomenon with lower percentages of teenagers, both males and females, marrying. In 1960, almost 52 percent of females who married in Utah were teenagers compared to 40 percent nationally, while 20 percent of the males in the state who married were teenagers compared with 14 percent nationally. In 1982, 28 percent of the females who married in Utah were in their teens, while 19 percent of all marriages nationally occurred to teenage females in 1981. (In Utah, 1981, it was 31 percent.) Ten percent of the marriages were to teenage males in Utah

NOTE: RATES ARE NOT COMPUTED FOR LESS THAN SEVEN EVENTS.

in 1982, while nationally males accounted for only eight percent of all marriages in 1981. (In Utah, in 1981 it was 12 percent.)

The percentage of females who divorce each year and who were married at less than 20 years of age has varied during the last 23 years in Utah, from a high of almost 50 percent in 1962, to a low of almost 37 percent in 1982. (It was 39 percent in Utah in 1960.) Despite some year-to-year fluctuations, the overall trend is decreasing. However, this is not true for Utah's resident males. The percentage of males who divorce each year and who were married as teenagers, has increased from 15 percent in 1960 to almost 19 percent in 1982. Despite annual variations, it appears that about one of every five divorces in Utah is to a male who married as a teenager. Nationally, this percentage for males has almost doubled from 9 to 17 percent between 1960 and 1981, however, this increase in 1981 may be partially due to annual fluctuations. There was an increase of more than two-and-a-half percentage points nationally between 1978 and 1979.

Despite these trends, which show lower percentages of total marriages to teenagers and divorces to persons who married as teenagers in Utah, there are disproportionately higher percentages of divorces each year to persons who married at less than twenty years than to persons who married at twenty years of age or older.

Although this phenomenon was not true nationally in the early 1960s, it became true in 1968, when for the first time, the percentage of divorces to persons marrying at less than twenty years was greater than the percentage of persons who married at less than twenty years of age. Nationally, this phenomenon has continued through 1981, with the disparity between the percentage getting married and the percentage getting divorced increasing dramatically, e.g., in 1968, the percentages were: males 13.6 and 13.8 respectfully; and females, 32.8 and 33.8; while in 1981, they were: males 7.7 and 17.0 percent; and females, 19.2 and 38.3 percent.

Seasonal Variation

June and August are the most popular months for marriage in Utah for the years 1980-1982, while January is the month of the least number of marriages.

The high number of marriages in June and August may be related to the beginning and ending of the school year. Approximately 50 percent of all marriages occur among individuals of school age.

DIVORCE

DIVORCE

Divorce Rates

There were 7,957, 8,259 and 8,413 divorces reported in Utah for 1980, 1981 and 1982; however, for 1980 and 1981 only 7,802 and 8,077 transcripts were received. The crude divorce rate for Utah in 1982 remained the same as it was in 1979: 5.4 divorces per 1,000 population. The Utah rate is higher than the national rate; the U.S. rate was 5.1 in 1982. As shown in Figure 2, the U.S. and Utah divorce rates have increased steadily since 1960. During this period, except for 1976, the Utah rate has been consistently higher than the rate nationally.

The first year for which the divorce rate was computed for the United States was 1867. The divorce rate for that year was 0.3 per 1,000 population. During the following 113 years the rate increased steadily, with deviations only during wars (when the rate increased) and depressions (when the rates decreased). Utah divorce data, numbers and rates, are complete only since 1940.

Crude divorce rates are based on the total population and therefore may be misleading depending on the proportion of married persons in the population. A divorce rate calculated on the number of married persons is a more accurate measure of the incidence of divorce since this is the only segment of the population which is at risk to divorce. We have estimated the number of married women for 1971 through 1982. The divorce rates per 1,000 married women for those years compared with national rates are presented in Table 11 and Figure 7. The divorce rate per 1,000 married women in Utah was 10.9 in 1960; 16.8 in 1970; 25.1 in 1980; and 24.9 in 1982. These differences indicate that the increase in the number of divorces is partially due to reasons other than the increase in the number of persons in the married population.

Recently there has been considerable interest in comparing the crude divorce rate of Utah with that of other states in the United States. We must emphasize that legitimate comparisons cannot be made. Divorce rates between states are not comparable for the following reasons: (1) divorce laws including grounds for divorce and length of residency vary widely from state to state; (2) the divorce laws are enforced differentially; and (3) the age

distribution of married persons and the mean age at marriage vary from state to state. Therefore, these statistics must be used with caution. The Statistical Abstract of the U.S. includes crude divorce rates reported by the individual states. Table 12 shows the divorce rates for Utah and the other mountain states for the years 1970, 1975, and 1980-1982.

[c] NATIONAL DATA FOR UTAH MAY DIFFER FROM STATE REPORTED DATA DUE TO DIFFERENCES IN REPORTING.

As can be seen, Utah's crude divorce rate is lower than any of the mountain states for any of the years given. Again, the different state requirements for residency, legal grounds for granting a divorce, and completeness of reporting could account for all variations in states' rates.

Table 13 shows the divorce rate per 1,000 population for each district and county by year, 1980-1982. The rates range from lows of 1.4 in Morgan County, 1980; 2.3 in Juab County, 1981; and 1.3 in San Juan County, 1982; to highs of 7.1 in Weber County, 1980; 7.9 in Grand County, 1981; and 7.7

NOTE: TRANSCRIPTS RECEIVED. RATES ARE PER 1,000 POPULATION AND ARE NOT COMPUTED FOR LESS THAN SEVEN EVENTS.

in Weber County, 1982. The rates for Morgan and Juab counties are based on a very small number of divorces, 7 and 16, respectively and are not statistically reliable, while the rates for Weber County are based on large numbers and are relatively stable. (Weber County's divorce rate in 1981 was 7.3).

Residents of counties with lower divorce rates do not necessarily have relatively fewer divorces than those counties with higher rates. What the variations may imply is that people, particularly for less populated counties, may file for divorce as residents of counties with larger populations.

Median Age at Divorce

In Utah, the median age of all divorces for women has varied between 27 and 28 years since 1970; while the median age for men has remained fairly constant at 30 years, Table 14. For first marriages, during this period, 1970-1982, females' median age of divorce from first marriages is 25 or 26 years, and for males 30 or 31 years. There is a six year difference in median ages for both males and females between their first and second divorces with the median age for females at 33 years and males 35 or 36 years.

Between 1980 and 1982, there were approximately 1,100 second divorces per year to both males and females. Although this number is relatively small, about 14 percent of all divorces in the state, still over 1,100 females have had a second divorce by the time they are 33 years of age.

Children Involved in Divorce

There are two measures of child involvement: (1) the mean number of children per divorce, and (2) the involvement rate, i.e., the number of children less than 18 years of age per 1,000 children under 18 years of age. Table 15 lists both the mean number of children per divorce and the involvement rates for the years 1960, and 1970 through 1982.

Although the number of children involved in divorce increased dramatically during the last twenty years in Utah, (in 1982 there were more than three times as many children than in 1960, and almost twice as many as in 1970), the mean number of children involved has shown a steady decrease

NOTE: THE MEDIAN AGES FOR UTAH, 1970-1982, MEDIAN AGE TO WHOLE YEAR, IS DUE TO THE METHOD OF COMPUTING MEDIAN AGE. UTAH'S DATA ARE UNGROUPED AND INDIVIDUAL YEARS ARE USED, WHILE MEDIAN AGES NATIONALLY ARE COMPUTED FROM GROUPED DATA IN FIVE YEAR AGE GROUPS.

[1] NATIONAL CENTER FOR HEALTH STATISTICS "ADVANCE REPORT OF FINAL DIVORCE STATISTICS, 1981," MONTHLY VITAL STATISTICS REPORT, VOL. 32, NO. 9, SUPP. 2, DHHS PUB. NO. (PHS) 84-1120, PUBLIC HEALTH SERVICE, HYATTSVILLE, M.D., JAN. 17, 1984.

from 1960 to 1982. In 1960, the mean number of children per divorce was 1.83, while there were 1.39 children in 1970; and 1.15 children in 1982.

Another statistic is the rate of involved children less than 18 years of age to all children in the state who are less than 18 years old. This statistic is the measure of the effect of divorce on the community in terms of how many children come from divorced families compared to the total number of children in the community.

In 1982, 16.8 out of every 1,000 children under 18 years of age were from divorced families in Utah. This compares with a figure of 7.1 per 1,000 in 1960--an increase of over 136 percent over the last 23 years.

Duration of Marriage

The modal or most frequent year of marriage in which divorce occurs is 1 year (more precisely: greater than 1 year, but less than 2 years of marriage). Of those dissolutions which occur before 1 year of marriage has been completed, over 28 percent are annulled. Those annulments, occurring in the first year of marriage, constituted over 68 percent of all annulments granted in 1982. The median duration of marriages ended by divorce or annulment was 5.1 years in 1982.

In 1981, the latest year for which national figures are available, the median duration of marriage, nationally, was 7.0 years for the states in the Divorce Registration Area (DRA) and 5.1 years for Utah. Table 16 gives Utah's standing of median duration of marriage in years in comparison to other states in the DRA for 1980 and 1981.

TECHNICAL APPENDIX

TECHNICAL APPENDIX

In 1957 the National Center for Health Statistics (NCHS), of the United States Department of Health and Human Services, identified registration areas for the collection of marriage and divorce statistics. These areas are referred to as the Marriage Registration Area (MRA) and the Divorce Registration Area (DRA). The MRA consists of 41 states and the DRA, 28. The State of Utah participates in both programs. In the United States, 80 percent of all marriages and 60 percent of all divorces occur within these two registration areas. Membership is voluntary for all states but certain requirements must be met in order for a state to be admitted. One of the major requirements is the maintenance of central marriage and divorce records. The principal advantage of such a system is that uniformity in statistical reporting is upheld. The NCHS, through the registration areas, receives microfilmed copies of marriage and divorce certificates from which special studies are made. The uniformity of certificates enables in-depth studies of marriage and divorce to be carried out at the national level.

The tables and graphs in this report have been prepared from marriage and divorce certificates filed with the Bureau of Health Statistics.

Title 30 of the Utah Code provides for compliance in reporting all marriages to the Bureau of Health Statistics:

> 30-1-11. Return of license after ceremony--Failure--Penalty.--The person solemnizing the marriage shall within thirty days thereafter return the license to the clerk of the county whence it issued, with a certificate of the marriage over his signature, giving the date and place of celebration and the names of two or more witnesses present at the marriage. For failure to make such a return he shall be guilty of a misdemeanor.
>
> 30-1-12. Clerk to file license and certificate.--The license, together with the certificate of the person officiating at the marriage, shall be filed and preserved by the clerk, and shall be recorded by him in a book kept for that purpose, which shall be properly indexed in the names of the parties so married. A transcript thereof shall be promptly certified and transmitted by the clerk to the state registrar of vital statistics.

In the case of divorce or annulment, reporting is required under the Vital Statistics Act.

> 26-2-25. Divorce or adoption - Duty of court clerk to file certificates or reports.
> (1) For each adoption, annulment of adoption, divorce, and annulment of marriage ordered or decreed in this state, the clerk of the court shall prepare a divorce certificate or report of adoption on a form furnished by the state registrar. The information necessary to prepare the certificate or report shall be supplied to the clerk by the petitioner at the time the petition is filed. The clerk shall prepare the certificate or report and, immediately after the decree or order becomes final, shall complete the remaining entries. On or before the 15th day of each month, the clerk shall forward the divorce certificates and reports of adoption competed by him during the preceeding month to the state registrar. For each such certificate the clerk shall collect the court cost $2 from the petitioner.

The divorce statute, section 30-30-7, specifies that the decree of divorce becomes absolute (final) at the expiration of three months from the date the decree is entered, unless there is an appeal or the court, for good cause, orders a different date, but not more than six months thereafter. In most instances, the divorce certificate is completed at the time the decree is entered and the date the decree becomes final is 90 days later. The certificate is then transmitted to the Bureau. For some decrees, during the intervening 90 days an appeal is filed and the final date is delayed or the decree may be set aside and never become final. Occasionally the Bureau is not notified of these changes. It is difficult, particulary at the end of the year, to reflect all these changes so that we have accurate statistical tabulations.

Data for this report are tabulated directly from each item contained in the certificates. The forms used for reporting marriages are pictured in Figures (A and B). This form was revised in 1982 and contains all of the items on the standard Certificate of Marriage recommended by the National Center for Health Statistics. Both records contain essentially the same information with the exception of the additional license information on the Utah form. The Certificate of Divorce, Annulment, or Dissolution of Marriage, Figures (C and D), was also revised in 1982 and is being used throughout all of Utah's counties for submitting final divorce and annulment records to the Bureau.
